AI: Firebase Studio, Gemini AI
Core: Full-Stack Development, RBAC, SaaS Applications, Real-Time Systems, Responsive UI/UX, Performance Optimization

EXPERIENCE

Full Stack Developer — Macro Print Pack *July 2025 – Present*
Freelance / Contract | Ludhiana, Punjab | Concurrent engagement

- Independently developed and continuously maintain a complete **order-to-dispatch business management application** with **7–8 role-based dashboards** for Admin, Designer, Accountant, and operational teams.
- Digitized paper-based business processes into a centralized application, making order, production, employee, attendance, and operational workflows more organized and accessible.
- Implemented **QR-code employee ID cards, punch-in/punch-out attendance, paid/unpaid leave management, and employee-side leave applications**.
- Develop new features daily, resolve production bugs/errors, optimize application performance, and improve responsive UI/UX with interactive animations.
- Diagnosed and resolved real-world performance issues, including slow application response during high-volume operations such as processin g**1,000+ orders**
- Collaborate directly with clients through daily calls/online meetings and periodic offline meetings to understand requirements and deliver business-critical changes.

Full Stack Developer — KB Print Hub *July 2025 – Present*
Freelance / Contract | Concurrent engagement, alongside Macro Print Pack | Team of 2

- Independently built a production-grade **printing & packaging management platform** covering the complete workflow from **order building to production tracking, inventory/stock management, and dispatch**, working alongside one collaborator.
- Developed **9 role-based dashboards** for Admin, Order Builder, Designer, Kappa, Paper, Screen, Jar, Dispatch, and Stock departments.
- Implemented department-wise real-time order tracking, production workflow management, stock/inventory operations, issue handling, and dispatch lifecycle tracking and completed **1,600+ orders.**
- Built **admin-controlled user approval and role assignment**, ensuring new users receive application access only after administrator approval.
- Implemented controlled data operations where non-admin users cannot directly delete critical orders/stock and must submit requests for administrator approval.
- Developed secure authentication, protected routes, real-time Firestore synchronization, dynamic dashboards, file/image handling, and job-card generation.
- Continuously enhance the application through feature development, bug fixing, performance optimization, and UI/UX improvements.
